Assistant Commissioner for Patents
Washington, D.C. 20231

SUPPLEMENTAL AMENDMENT

Sir:

IN THE CLAIMS

Please add new claims 29 through 33 as follows:

29. A computerized system for organizing content available from a plurality of locations for presentation to a viewer via a transmission system, the system comprising:

a set of templates stored in memory and used to generate a set of corresponding content pages, each template identifying one or more computerized locations at which content is available and one or more transformation techniques to be applied to the content to thereby generate a content page;

a capture engine for capturing the content from the one or more locations specified in the set of templates;

a display engine for transforming the captured content from each of the locations in accordance with the one or more transformation techniques specified in the
